Company profile:	Brain Force Software AG is an IT service provider, which has been undergoing the transformation from being purely a project provider to a technology business since its IPO in 1999. Brain Force Software currently has three strategic organizational	

units. The bf classic division stands for IT consulting, application development, as well as data, system and network management. It also provides assistance in technical support and project development. The 1gravity business division is a consulting and technology unit which develops web pages, portals and business-to-business applications, as well as offering a proprietary content management system. The one4net division offers project development and software products for telecommunication networks and for the Internet, as well as products and services for network automation and security. Brain Force currently has over 700 employees working at nine locations in six European countries.
