Keplerstrasse 1

D-47506 Neukirchen-Vluyn Tel.: +49-2845-294-0

Internet: <a href="http://www.lantec.de/">http://www.lantec.de/</a>

Company profile: LANTEC AG has developed an Internet-based, holistic telemetry solution for robots

as artificial clients and is striving for market leadership with its product -integration in the area of internet appliances (EIA). The development of the new field of business -integration is for LANTEC AG the outcome of the merger with the two Krefelder companies MANDATA (mainly consulting services) and SAB, and the

bundling of the core competencies of the three companies.

integration stands for Internet Integration and is the counterpart to the classical IT systems integration. The two terms s- und -integration are the names of the two business divisions of LANTEC AG. In the area of s-integration, the core division of LANTEC AG, the business activities of the three merged companies have been expanded and actively advanced in the corresponding fields of competence

## wiener borse.at

acquired through the merger. The area of -integration is LANTEC AG's division with a promising future boasting developments in the field of Embedded Internet Appliances.
